

Online Training Modules for School Nutrition Programs

The following online training modules are provided to help prepare dietetic interns for work experiences in the National School Lunch and School Breakfast Programs (School Nutrition Programs) (SNP). The training modules provide general program information, as well as more detailed information on nutrition topics. Please note, that while USDA strongly supports dietetic interns completing rotations at State agencies to improve the effectiveness of Child Nutrition Programs when appropriate, this support does not constitute endorsement of the Academy of Nutrition and Dietetics. The Accreditation Council for Education in Nutrition and Dietetics, the accrediting agency for the Academy, sets standards for nutrition and dietetic education programs (including dietetic internships), evaluates programs against the standards and awards accreditation to programs demonstrating compliance with the standards.
