Place  
Alexandria,  
VA  
22314

**TO:** Jesus Mendoza, Jr.  
Regional Administrator  
Western Regional Office

This letter is in response to the March 25, 2020 correspondence from Oregon WIC requesting flexibility in the food package requirements in the Special Supplemental Nutrition Program for Women, Infants and Children (WIC) as a result of significant impacts to providing WIC program services to participants due to COVID-19.

Oregon WIC cited significant impacts on vendors' abilities to maintain inventory of certain WIC-eligible products and requests a waiver of select minimum requirements and specifications and/or the maximum monthly allowances as outlined in 7 CFR 246.10(e)(9)-(12) for specific supplemental foods. Pursuant to the authority granted in section 2204(a)(1) of the Families First Coronavirus Response Act (P.L. 116-127), USDA's Food and Nutrition Service (FNS) approves the waiver request through **May 31, 2020** in the following manner:

- **Milk and Yogurt.** Participants will be able to substitute cow and goat milk and yogurt of any available fat content despite the designation of their food package.
- **Cheese.** Participants will be allowed to substitute 12-ounce containers of string cheese when the prescribed size is not available, despite the designation of their food package.
- **Infant Fruits and Vegetables.** Infants 9 months through 11 months receiving a cash-value voucher for fresh fruits and vegetables may substitute canned and/or frozen fruits and vegetables with no added sugar, fats, oils or salt (i.e., sodium).

Given the issue of low stock as a result of increased customer demand during the COVID-19 epidemic, USDA FNS understands that holding vendors to normal minimum requirements and specifications and maximum monthly allowances for supplemental foods is not possible at this time. A waiver to provide administrative flexibility to allow the food substitutions and flexibilities described above removes a requirement that under current circumstances could prevent or impede the provision of essential Program services to participants.

Following receipt of a food package waiver, Oregon WIC will need to advise vendors and participants that substitutions should be made when the prescribed benefit is unavailable for purchase and these flexibilities are available until May 31, 2020. For participants prescribed whole milk, the State agency will inform participants to select the highest fat milk available. For participants prescribed fat free or 1% milk, the State agency will inform participants to select the

lowest fat milk available. The State agency will inform participants to come as close to the maximum benefit amount prescribed when they are selecting package sizes.

The waiver authority at section 2204(b)(1) of P.L. 116-127 requires the State agency to submit a report which includes a summary of the use of this waiver and a description of whether this waiver resulted in improved services to women, infants and children. The State agency shall provide the Regional Office with this report no later than 1 year after the date of approval.

USDA FNS appreciates Oregon WIC's commitment to addressing the operational challenges impeding the delivery of WIC benefits to needy women, infants and children.

Sincerely,

A handwritten signature in black ink that reads "Sarah Widor". The signature is written in a cursive, flowing style.

SARAH WIDOR
